A creative silent space, fulfilling your demands for various creative works.

The self-developed carbon polymer composite panel, aviation aluminum and insulating glass forms the main structure of the booth.

SOLIDWORKS mechanics modeling simplifies the booth assembly with only one type of fastener.

INSUL MARSHALL ACOUSTIC simulation ensures well designed and performed sound transmission & insulation property of the booth.

Labyrinth duct configuration with positive pressure turbine low noise

fresh air system, efficiently ensure fresh air in the booth.

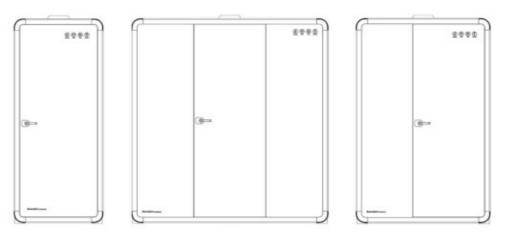

Natural light central lighting in the booth is adapted to different standards of input and output power systems.

Soundbox designers are prepared for predictable expansion, so each booth is pre-programmed with furniture installation nodes for different application scenarios.

It is a powerful and useful, though not the most perfect mini-space.

MOVABLE SILENCE BOOTH

GENES

Soundbox is an acoustic technology company. Based on the understanding of environmental acoustics, we follow the scientific attitude of psychoacoustics and physiological acoustics to design and develop each acoustic products.

EVOLUTION

Soundbox is the creator and namesake of the "Silence Booth"

Starting from the first industrial application of "Silence Booth" in 2012,

We launched the very first commercial "Silence Booth" 2016 in China.

They are the evolutionary works of acoustic application technology.

FLEXIBILITY

Soundbox Silence booth, a creative silent space, fulfilling your demands for various creative works.

The self-developed carbon polymer composite panel, aviation aluminum and insulating glass forms the main structure of the booth. SOLIDWORKS mechanics modeling simplifies the booth assembly with only one type of fastener. INSUL MARSHALL ACOUSTIC simulation ensures well designed and performed sound transmission & insulation property of the booth.

Soundbox silence booth is a powerful and useful, though not the most perfect mini-space.

LOW CARBON

Soundbox "Silence Booth" is the first company use recycled carbon plastic materials

For each Soundbox booth:

Carbon footprint ≤0.071kg CO2e, energy consumption ≤0.4MJ

Air acidification ≤0.0001kg SO2e, water eutrophication ≤0.00002 PO

Care for our global home with technology.

>>03 Movable silence booth

The SR series MOVABLE SILENCE BOOTH

SR Contracted

SR Series "Silence Booth" promotes low-carbon, simple, safe and practicalism.

Optimize non-essential features and configurations.

The fine R-angle appearance and elegant color scheme make

it looks delicate, and easily integrated into the environment.

Sound insulation tempered glass

With multiple laboratory tested results, conventional glass is not able to fulfill our needs to achieve our desired noise reduction performance, we had tested and chosen to use tempered

Damping feet

Bearing capacity and damping coefficient are the basic data for designing vibration-damping products. Sound box insists on the use of virgin rubber modified material for damping parts because such rubber has much a such rubber for the contraction of the contractionbetter damping coefficient and it is more durable.At the bottom of Soundbox Silence Booth, there are four damping "feet" to supporting the booth. Thanks to the damping "feet", the Silence Booth is not standing on the floor directly; however, there is an 8mm gap between the bottom and floor. Therefore, the acoustic bridge is largely prevented between the booth and the floor. The damping feet design makes it easier to adapt to different ground conditions. More importantly, the 8mm gap is specially designed for a movable booth. This gap is just good for our moving tool. Moving the Silence Booth on the same floor is no longer an exhausting work!

Turbo fresh air system

High air pressure and low noise Centrifugal fan, and labyrinth type air ducts effectively reduce the possibility of fugitive sound inside and outside the booth. With the 125m³/h large air volume operation efficiency, air circulates every two minutes, and these ensure good oxygen content and negative carbon dioxide pressure in the booth.

Preferred furniture

The ergonomically designed furniture configuration for the booth space is an important component of the Silence booth office and leisure scenarios. At the same time, Soundbox designers are prepared for predictable expansion, each cabin is pre-programmed with furniture installation nodes for different applications.

Sound Insulation

INSUL MARSHALL ACOUSTIC acoustic simulation accurately predict and realize the sound insulation performance of the booth. And the standard and PLUS versions cater to the requirements of different usage scenarios.

The booth is equipped with the 4000K natural light color temperature LED central main lighting system. But there will be different set-up fitting to various sizes, so as to ensure well performance of different booth.

Fastening assemble

Our design philosophy has always emphasized on simplicity and minimalistic approach; hence our whole model only utilizes 90°-degree fasteners.

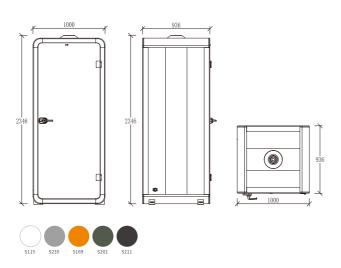

Motion Sensor

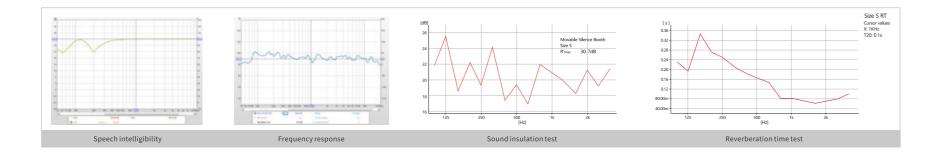

We care about energy saving and environment protection. Soundbox Silence Booth is equipped with motion sensor to control the lighting and ventilation system. It will be fully functioning when, and only when you are inside the booth.

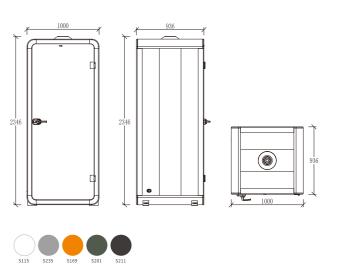

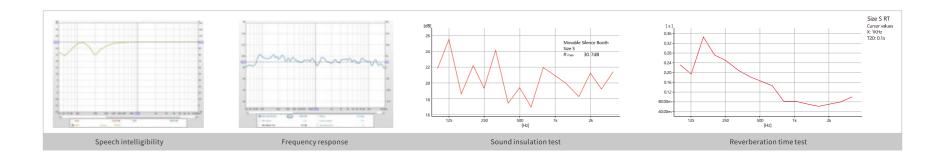

Product model	SR-S (F1)
Booth facilities	 ★ 100-240V/50-60Hz power supply. ★ 4000K/421LM natural lighting system. ★ Motion sensor and switch control for light and fan. ★ Emergency safety hammer.

Double laminated glass

The framed version is design to meet the demands of functional scenes and highnoise environments, and adopts 5+1.52+5 non-equivalent thickness laminated structural glass, which improves the safety of glass, calmly reduces the amplitude effect of glass, and improves the sound insulation performance of the glass.

Acoustic interior

Our booth has an effective area of 60% covered Polyester Fiber sound absorbing material.

Sound insulation booth

INSUL MARSHALL ACOUSTIC acoustic simulation accurately displayed that by

The tailor-made hydraulic door closer designed to guarantee the using superior sound insulation carbon plastic composite material, we can achieve easy installation and flexibility while assuring good sound insulation performance.

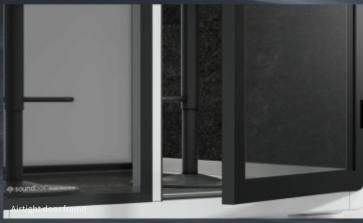

Hydraulic door closer

restriction, positioning and closing of the hatch. The hydraulic closing design, together with the EPDM airtight rubber strips maximize the airtight and soundproof performance of the booth.

SILENCE BOOTH

SRP Waterproof

Following Grade III waterproof standard, the silence booth use water and corrosion resistant carbon plastic composite panel, aluminum and tempered glass to form its main structure, which ensure high adaptation to the outdoor extreme high & low temperature. At the same time, the use of a hermetic seal at the joint of the components forms a double anti-leaching

Thermal insulation

The excellent water resistance, sunlight resistance, acid resistance, salt resistance, corrosion resistance, zero emission and fire resistance of the carbon plastic composite panel, configured with the advantageous heat preservation characteristics of the hollow glass, builds the excellent heat preservation and energy saving performance of the booth.

Air Conditioner

L/XL model silence booth is equipped with top-mounted integrated air conditioning system, 500W/24V power consumption, 2500W cooling capacity, evaporator air volume is set to 350m3/h, R32 environmental friendly refrigerant, so that we meet the temperature regulation when also protect the earth's ozone layer.

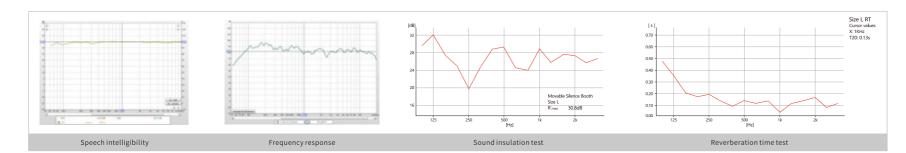

Equipped with the 4000K natural light color temperature LED central main lighting system in the silence booth, its 1600Lux illumination meets the needs of regular use demand with LED hidden lights on the top of the seats on both sides, which caters to the psychological environment optics of the silence booth.

Office Third Space

Providing a good environment and platform for ideas creation and exchange is part of our daily work. Our booth is the platform that gives you your desired environment.

A cup of coffee, a private call or a small talk, whenever you need to take a break from work and need a place to relax.

Public Third Space

It is always noisy when we want to take some rest in public places. It is always difficult for us to make a phone call, to have a conversation when we are in public places like hotel, airport, train stations, hospital. Soundbox Silence Booth creates a private space inside the public area, giving you enough quietness.
